

## ELEMENTS COLLECTION

EARTH / WATER / AIR / FIRE.

They are muscles, bones, nerves and blood of Mother Nature. Individually, they are each a force of creation and evolution existing beyond the veil of consciousness. Combined together, they become a door to an unreal reality!

The Elements erect the space with their voices, and their powers open tears between dimensions from which unimaginable creativity pours in. Their vibrations are conflux of primeval emotions, anchored to the Now in sound sculptural artform.

# ELEMENTS

## FIRE

*"...A metaphysical constant of the world.  
The Genesis of Fire is between two dimensions.  
It is a spark of life – everything comes with it, and goes with it..."*

This element is carrying the genes of all matter in the Universe. Every star, every planet, every civilization that ever existed was built on fire and ash. Ezofication set ablaze this primeval spark of life in the wood, merging the supremacy of Fire with a Bass guitar.

The body of this instrument was forged in the inferno of blazing energy, tamed with the metaphysical hammer of the Universe. Activation and ignition of the instrument provokes the spreading of fire in a form of bass sound heat.

Layered volume of Fire can go from pleasantly warm to extremely hot. At the peak of its power the bass of Fire is a magnificent inferno of passion, radiating the heat and luciferin.

Body	Alder 360 ②
Body top	Flame Mazer 360 ②
Finish	Blow Torched/Gem Enriched
Neck	Wenge - U shape 360 ②
Fingerboard	Wenge - radius 12" 360 ②

## AIR

*"...The messenger of the sky. The invisible moving force. Ethereal wings of infinity. At the same time, defiant rogue with sharp attitude...."*

Air consists of the unseen - the thoughts, souls and the spirits. This ethereal force from Ezo dimension orchestrates the rhythm of life itself – life's inhale, life's exhale. And that rhythm is the same for the largest creature to the smallest cell.

Like a thunder, Ezofication struck and electrified wood impregnating it with the wind of tones. This Bass guitar is hiding an unpredictable temperament; it grabs attention like a lightning and warns with a jolting sound.

At the apex of its bass glory, this winded instrument is an Air storm that sparks creativity and dangerously seductive euphony. It is a wind-force power easily pushing the biology into the Ezo dimension. Air is the driving force behind this exchange, the invisible philosopher of the soul that extends his hand to offer total freedom.

Body	Alder 360 ☺

## WATER

*"... Being everywhere and always. Water is in every aspect of existence. Life itself exists because of it. It supports and protects life. Sometimes roughly..."*

Even the smallest of water's particles carries the code that gave birth to creation inherited from Fire. Everything that we know carries that spirit of life which radiates, vibrates and demands evolution.

Element Water in a shape of sound was molded by Ezofication of the wood and crafted into a bass guitar. Its tone gives the sense of absolute freedom and conjures compulsion of movement.

Water starts its adventure with just a single drop and a volume valve can release a waterfall of serenity. But when the weather changes, from underneath the beauty of surface a bass tsunami rises that can flood and overwhelm all senses.

# EARTH

*"...Earth is the canvas for the Nature. Incubator of life.  
The body of the planet. Its slightest movement  
changes everything and creates new life forms..."*

Element Earth doesn't hide; it is pure matter - strength and endurance incarnate. Its existence is rounded with a sharp magnetic serpent and its presence felt across the deep space. Ripped straight from the molten heavy core, this instrument is a monument to Earth itself. It is a mountain of sound, a rooted hilltop with a gaping mine where the one can endlessly dig for creativity and inspiration.

Earth's voice is deep, commanding and droning. As rich soil, it produces voluminous vibrations full of tone minerals and like magnetic field it spreads far. Its power is molded like clay, from lightness of dust to hardness of rock. But when it's fully woken up, this fragment of Earth will shake the ground as an Earthquake, will pierce concrete and stone, body and soul to rock and roll.
